Thank you for the heads up on this significant development. Clearly EPA is not moving fast enough for the organizations in New England. I wonder if they're seeking the same standard from each state? I'll have to look into that.

Good morning, Alex.

Nice to see you earlier this week in Portsmouth. I wanted to give you a heads up on the petition we just received, attached and below. I understand that MA and CT have received similar petitions, and expect that other NE states will also in short order.

We will keep EPA apprised as we chart a path forward.

Best,  
Julie

**Subject:** Joint Petition for Rulemaking to Establish a Drinking Water Standard for PFAS

Dear Secretary Moore:

Attached please find a joint petition for rulemaking from Conservation Law Foundation, Vermont Natural Resources Council, Rights and Democracy, Vermont Public Research Interest Group, and Toxics Action Center requesting the Vermont Agency of Natural Resources to establish a drinking water standard for Per- and Polyfluoroalkyl Substances (PFAS) that is protective of public health.

CLF is mailing you a hard copy of this petition for rulemaking, along with a thumb drive containing the PDF sources to which we cite in the petition. If the cc'd parties wish to also receive a hard copy of the petition in the mail and/or a thumb drive containing cited PDF documents, please contact me directly with such a request.

Sincerely,

Elena
